

mObywatel

How to verify documents in mObywatel app?

There are three methods: the visual, functional and cryptographic one (with a QR code).

1. Visual method

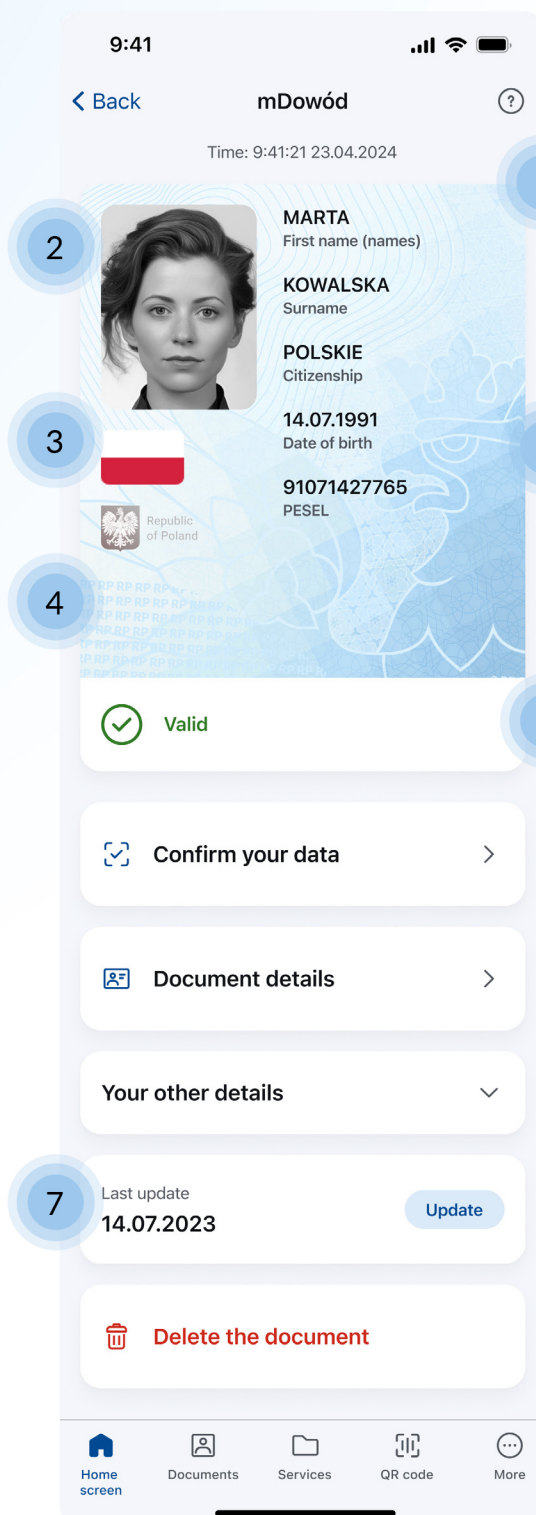

It is based on visual verification of individual elements of an electronic document.

Photo – it should confirm your current appearance.

The white and red flag – it is a dynamic element and should move.

Emblem-shaped hologram – it should change its colour when you move the smartphone.

The date of the last data update.

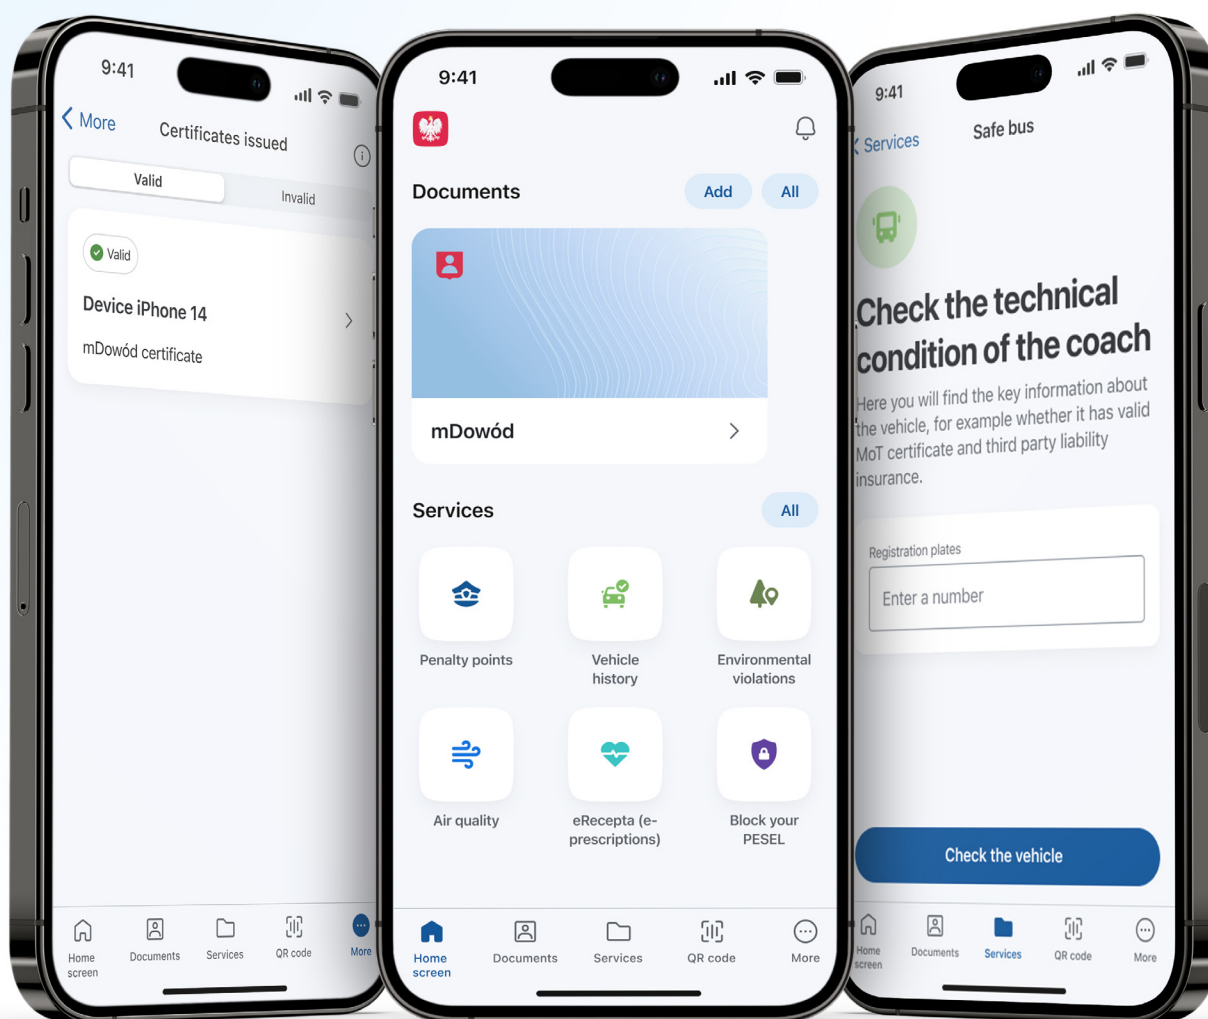

Time – the current date and time should be displayed.

Background – it should be light blue and contain wavy lines, the inscription RP and the outline of the eagle.

Document status – confirmation that it is valid.

2. Functional method

It is based on checking if the application works correctly. In order to do that, display different screens with services, documents or functions. This is a good addition to the visual method.

Download and use the mObywatel app.

3. Cryptographic method (QR code)

It is based on verifying the document by using a QR code or a numerical code next to it.

How to verify your document using a QR code?

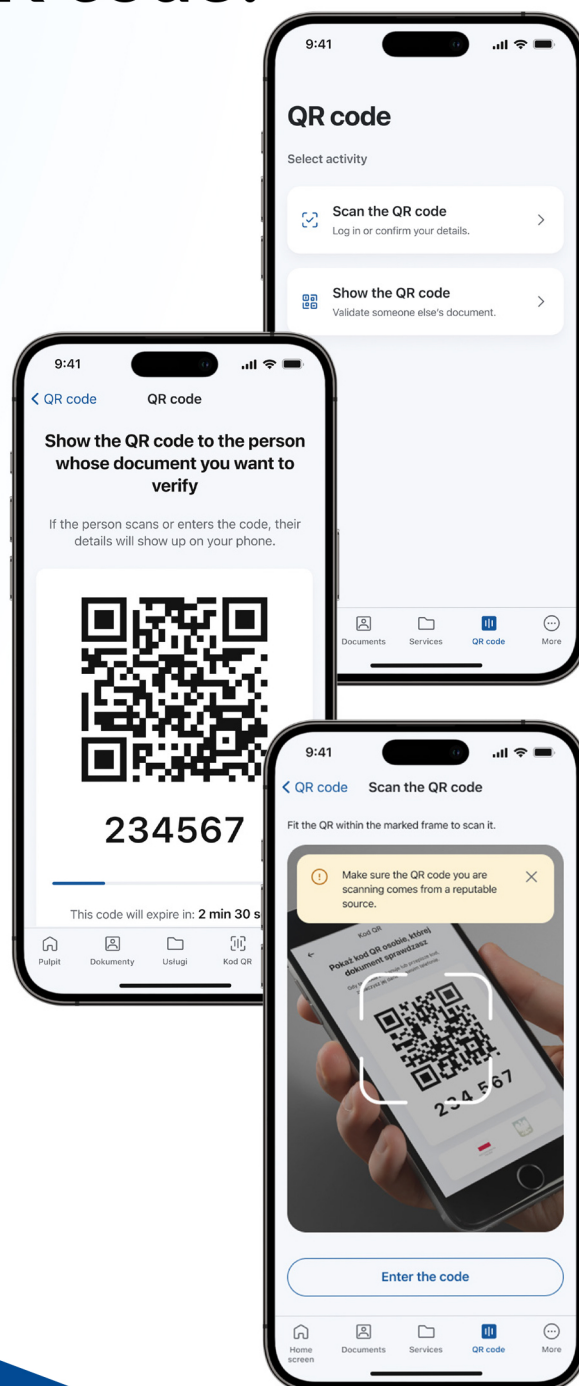

1. Go to the given document in the application and select **Confirm your data**.
2. Review the information and press **Get Started**.
3. Scan the QR code on the device of the person who wants to confirm your permissions or enter the six-digit code next to the QR code.
4. See who and what data you provide.
5. Tap **Share Data**.
6. That's it! Your document has been confirmed.

Your data will appear on the device of a person who wants to check your document. It will be visible just for a moment. Afterwards, it will irrevocably disappear and will not be saved on the device.

How to confirm someone's document using a QR code?

1. At the bottom of the app home screen, tap **QR Code**.
2. Select **Show QR code**.
3. Show your QR code to the person whose document you want to check or enter the six-digit code under the QR code.
4. Wait for the other person to scan the QR code or enter the numeric code and press **Share the data**.
5. View the document data. It will be visible just for a few minutes. Afterwards, it will irrevocably disappear because it is not saved on your device. After confirming your details, click **Finish**.

You can also confirm documents without logging in to the application. Just install the application, run it and create a QR code. You can also verify the documents by using your computer. Just go to the website weryfikator.mobywatel.gov.pl.
